Data Sheet
Name of product
Cell spreader

1、Product Overview		
1.1	Product Features	The product features a round and smooth surface, minimizing damage to cells. It solves the problems of smearing contamination and uneven distribution in biological experiments, and is suitable for use with different culture vessels.
1.2	Intended use	It is mainly used for microbial inoculation, transfer and cultivation operations.
1.3	Structural composition	/
1.4	Material	HIPS
1.5	Sterilization method	EO
1.6	Product expiration date	Sterilization validity period: 5 years.
1.7	Other information	Endotoxin-free, non-cytotoxic, free of inhibitors and heavy metal contamination.

2、Product performance		
2.1	Appearance	White
2.2	Size Drawing	

3、product packaging		
3.1	Packing Specification	Packaging: paper-plastic bags, cartons, etc. (For reference only, customizable as required).
3.2	Package dimensions	10 pcs/bag, 5 pcs/bag, individual.
